

# TOYOTA TIDBITS

Presented By LA Region Product Training

## LEGEND...WAIT 4 IT...DARY!

Many of you attended TRLA-2501: On- and Off-Road Technologies 4 Every Lifestyle last week. We hope you found the training informative and learned something new about the 4Runner as well as Toyota's on- and off-road technologies. For the next few Toyota Tidbits issues, we will continue to provide details on each 4Runner grade.

The 2025 4Runner gives a thoughtful nod to the beloved past generations while embracing its future. This includes: the legacy power rear glass window, "wrap over" quarter glass, Baja racing-inspired design, two new powertrains, including a hybrid option, game-changing, low-end torque, premium technology & safety, a modern and refined interior and much more!

## LIMITED | ON-ROAD GRADE – ELEVATED

## TOYOTA TALK | PLUG-IN HYBRIDS

### COURSE: TNTL-2501: PRIUS PHEV & RAV4 PHEV

TMNA is hosting a virtual dealer education for plug-in hybrids. The training will dive into the features, functions, and benefits of Toyota's Plug-In Hybrid technology, as well as share key sales points for the RAV4 Plug-in Hybrid and Prius Plug-In Hybrid. They will also discuss how to overcome common PHEV sales objections and highlight some Engage features that can help in sharing key product info. Click the links below to access the training on Wednesday (12<sup>th</sup>) and Thursday (13<sup>th</sup>).
